                                                                                                                                                                                                                                                                                            IsoId=P13608-2; Sequence=VSP 003072; DOMAIN: Two globular domains, Gl and G2, comprise the amino terminus of the proteoglycan, while another globular region, G3, makes up the C-terminus. Gl contains link domains and thus consists of three disulfide-bonded loop structures designated as the A, B, B' motifs. G2 is similar to G1. The keratan sulfate (KS) and the chondroitin sulfate (CS) attachment domains lie between G2

FEBS Lett. 206:73-77(1986).

-! FWOTION: This proteoglycan is a major component of extracellular larger. This proteoglycan is a matrix of cartilagenous tissues. A major function of this protein is to resist compression in cartilage. It binds avidly to hyaluronic acid via an amino-terminal globular region. May play a regulatory role in the matrix assembly of the cartilage.

-!- SUBCELLULAR LOCATION: Secreted; extracellular matrix (By
                                                                                                                                                                                                                                                                                                                                                                                                                        -!- TINKED (ABOUT 40) OLIGOSACCHARIDES.
-!- PTM: CONTAINS MOSTLY CHONDROITIN SULFATE, BUT ALSO N-LINKED AND OLIGOSACCHARIDES.
-!- PTM: THE KERATAN SULFATE CONTENTS DIFFER CONSIDERABLY BETWEEN ADULT AND FETAL BOVINE PROTEOGLYCANS.
-!- SIMILARITY: Contains 1 immunoglobulin-like V-type domain.
-!- SIMILARITY: Contains 1 EGF-like domain.
-!- SIMILARITY: Contains 1 EGF-like domain.
-!- SIMILARITY: Contains 1 Sushi (SCR) domain.
-!- SIMILARITY: Contains 1 Sushi (SCR) domain.
-!- SIMILARITY: Belongs to the aggrecan/versican proteoglycan family.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
